SESBANIA SEEDBALLS DISTRIBUTION

REPORT

To

Paul Keeley

Sustainable Global Gardens (SGG)

From

Robert Wawire

President, Rotary Club of Bungoma.

28th September 2021.

Introduction

The training and distribution of the Sesbania seedballs took place on 23rd September 2021 at Makali Riverside Park. A group of invited farmers who expressed interest in planting the shrub from different parts of Bungoma county attended the training and were issued with packets of Sesbania seedballs. The packets contained at least 100 Sesbania seedballs each.

Training

The training covered the following information about Sesbania:

- Description of Sesbania, where it is found, and how it is propagated.
- The use of Sesbania- fodder crop, soil conservation, green manure, mulch, firewood, windbreak, shade and bee forage.
- Management- weeding, harvesting, feeding livestock.

Conclusion

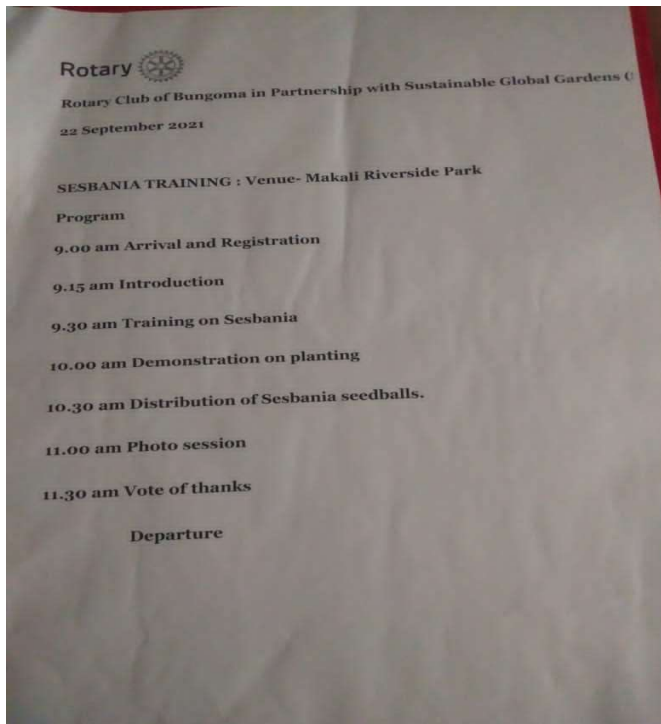

Most of the farmers who expressed interest in planting Sesbania seedballs came for the training. We had to limit the number of seeds per farmer to 100 each so that more farmers can access the seeds. We carried out more mobilization and we are ready to plant more with the farmers should you provide another bag of the seedballs. Thank you very much for the support to our community.
